[natmonlee.github.io/portfolio](https://natmonlee.github.io/portfolio)

Self-taught full-stack developer with a background in healthcare and a passion for building thoughtful, user-focused applications. After over a decade in the health sector, transitioned into tech and now manages the full development stack for a web app used by academic researchers. Strong in problem-solving, feature ownership, and quickly picking up new technologies.

## PROFESSIONAL EXPERIENCE

### Junior Software Developer - Protolyst (Remote)

**June 2024 - Present**

- Sole developer at a small company, managing the full technical stack for a research-focused web platform
- Builds and maintains features with React, TypeScript, Node.js, Firebase, and Google Cloud
- Provides user support via email and Slack and manages billing via Stripe integration
- Contributes to discussions on product direction, feature planning, and prioritisation
- Set up environment-based switching with a separate test server to support safer deployments
- Migrated backend from Node 14 to 18 independently, ensuring platform stability
- Developed and integrated a custom user feedback popup system, enabling real-time feedback collection and display

### Receptionist & Care Coordinator - Brockwell Park Surgery (London)

**November 2019 - June 2022**

- Promoted internally; managed patient care tracking, follow-up, and logistics
- Handled communication, appointment systems, and data exports

### Healthcare Assistant - King's College Hospital (London)

**June 2018 - November 2019**

- Delivered direct patient care and supported clinical teams

### Pharmacy Assistant & Medicines Counter Assistant - David Lewis Pharmacy (London)

**July 2012 - January 2018**

- Promoted internally; dispensed prescriptions and advised customers

## EDUCATION

---

### Diploma of Higher Education - Bath Spa University

**2007 - 2010**
